CUSTOMER CARE AND SERVICE

We recommend the use of original spare parts.

When contacting Service, ensure that you have the following data available.

The information can be found on the rating plate. Model, PNC, Serial Number.

 Warning / Caution-Safety information.

 General information and tips.

 Environmental information.

Subject to change without notice.

1. SAFETY INFORMATION

Conditions of use

This appliance is intended to be used in household and similar applications such as:

- staff kitchen areas in shops, offices and other working environment;
- farm houses;
- by clients in hotels, motels, and other residential type environments;
- bed and breakfast type environments;
- areas for communal use in blocks of flats or in launderettes.

WARNING! The appliance must not be supplied through an external switching device, such as timer, or connected to a circuit that is regularly switched on and off by utility.

In the interest of your safety and to ensure the correct use, before installing and first using the appliance, read this user manual carefully, including its hints and warnings.

To avoid unnecessary mistakes and accidents, it is important to ensure that all people using the appliance are thoroughly familiar with its operation and safety features.

Save these instructions and make sure that they remain with the appliance if it is moved or sold, so that everyone using it through its life will be properly informed on appliance use and safety.

1.1 GENERAL SAFETY

- It is dangerous to alter the specifications or attempt to modify this product in anyway.
- During high temperature wash program the door glass may get hot. Do not touch it!
- Make sure that small pets do not climb into the drum. To avoid this, please check into the drum before using the appliance.
- Any objects such as coins, safety pins, nails, screws, stones or any other hard, sharp material can cause extensive damage and must not be placed into the machine.

- Wash small items such as socks, laces, washable belts etc in a washing bag or pillow case as it is possible for such items to slip down between the tub and the inner drum.
- Only use the advised quantities of fabric softener and detergent. Damage to the fabric or appliance can occur if you overfill. Refer to the manufacturer's recommendations of quantities.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Do not use your washing machine to wash articles with whalebones, material without hems or torn material.
- Always unplug the appliance and turn off the water supply after use, clean and maintenance.
- Under no circumstances should you attempt to repair the machine yourself. Repairs carried out by inexperienced persons may cause injury or serious malfunctioning. Contact your local Service Centre. Always insist on genuine spare parts.

1.2 INSTALLATION

- This appliance is heavy. Care should be taken when moving it.
- When unpacking the appliance, check that it is not damaged. If in doubt, do not use it and contact the Service Centre.
- All packing and transit bolts must be removed before use. Serious damage can occur to the product and to property if this is not adhered to. See relevant section in the user manual.

- After having installed the appliance, check that it is not standing on the inlet and drain hose and the worktop is not pressing the electrical supply cable.
- If the machine is situated on a carpeted floor, please adjust the feet in order to allow air to circulate freely.
- Always be sure, that there is no water leakage from hoses and their connections after the installation.
- Any plumbing work required to install this appliance should be carried out by a qualified plumber.
- Any electrical work required to install this appliance should be carried out by a qualified electrician.

1.3 USE

- This appliance is designed for domestic use. It must not be used for purposes other than those for which it was designed.
- Only wash fabrics which are designed to be machine washed. Follow the instructions on each garment label.
- Do not overload the appliance. See the relevant section in the user manual.
- Before washing, ensure that all pockets are empty and buttons and zips are fastened. Avoid washing frayed or torn articles and treat stains such as paint, ink, rust, and grass before washing. Underwired bras must NOT be machine washed.
- Garments which have been in contact with volatile petroleum products should not be machine washed. If volatile cleaning fluids are used, care should be taken to ensure that the fluid is removed from the garment before placing in the machine.
- Never pull the power supply cable to remove the plug from the socket; always take hold of the plug itself.

- Never use the washing machine if the power supply cable, the control panel, the working surface or the base are damaged so that the inside of the washing machine is accessible.

1.4 CHILD SAFETY

- This washing machine is not intended for use by young children or infirm persons without supervision.
- Young children should be supervised to ensure that they do not play with the appliance.
- The packaging components (e.g. plastic film, polystyrene) can be dangerous to children - danger of suffocation! Keep them out of children's reach.
- Keep all detergents in a safe place out of children's reach.
- Make sure that children or pets do not climb into the drum.

1.5 CHILD SAFETY DEVICE

When you activate this device, you cannot close the door. This prevents children or pets to be locked in the drum.

- To activate this device, rotate the button (WITHOUT pressing it) inside the door clockwise until the groove is horizontal. If necessary use a coin.

- To disable this device and restore the possibility of closing the door, rotate the button anti-clockwise until the groove is vertical.

2. PRODUCT DESCRIPTION

- 1** Worktop
- 2** Detergent/Softener Dispenser
- 3** Control Panel
- 4** Door Handle
- 5** Door
- 6** Level Adjustment Feet (Front)

- 7** Mains Cable
- 8** Water Inlet Hose
- 9** Water Drain Hose
- 10** Hose Support
- 11** Transit Bolts
- 12** Back Feet

- 13** Door Blocking Button
- 14** Drum Lifter
- 15** Photo Register Label
- 16** Rating Label

ACCESSORIES

- **Plastic caps**

To close the holes on the rear side of the cabinet after the removal of the transit bolts.

- **Plastic hose guide**

To connect the drain hose on the edge of a sink.

3. CONTROL PANEL

- | | |
|----------------------------------|--|
| 1 Program Selector Knob | 6 Extra Rinse Touchpad |
| 2 Spin Selection Touchpad | 7 Delay End Touchpad |
| 3 Temperature Touchpad | 8 Easy Iron Touchpad |
| 4 Display | 9 Soak Touchpad |
| 5 Child Lock Option | 10 Start/Pause and Add Clothes Touchpad |

1 Program Selector Knob

Turn this knob to set a program. The washing machine will propose a temperature and automatically select the spin value provided for the program you have chosen.

The selector knob can be turned either clockwise or anticlockwise.

Position “off” to reset program/ switching OFF the machine.

At the end of the program the selector dial must be turned to position “Off”, to switch the machine off.

2 Spin Selection Touchpad

Press this touchpad repeatedly to increase or decrease the spin speed, if you want your laundry to be spun at a speed different from the one proposed by the washing machine.

No Spin

No spin option eliminates all the spin phases and increase the number of rinse.

Rinse Hold

By selecting this option the water of the last rinse is not emptied out and the drum turns regularly to prevent the laundry creases.

The door still locked to indicate that the water must be emptied out.

(To empty out the water see “When The Washing Program Is Completed, But There Is Water In The Drum” on page 16)

3 Temperature Touchpad

Press this touchpad repeatedly to increase or decrease the wash temperature if you want your laundry to be washed at a temperature different from the one proposed by the washing machine (symbol “*” corresponds to cold wash).

4 Display

- A)** Digital Number; will tell you:
- Washing cycle time.
 - Delay End time.
 - The alarm codes. Refer to the chapter "Troubleshooting" for their description.
- B)** Washing Phase icon
- C)** Delay End icon
- D)** Child Lock icon
- E)** Door Lock icon
- It is on, you cannot open the door.
 - It is off, you can open the door.

5 Child Lock Option

Your appliance is provided with CHILD SAFETY LOCK which permits you to leave the appliance unsupervised with the door closed without having to worry that children might be injured by or cause damage to the appliance.

Set this option before pressing the Start/Pause and after having selected the required wash program.

This function remains enabled even after the appliance is switched off.

Setting Child Lock option:

- To activate the function, press "Extra Rinse" and "Easy Iron" touchpads at the same time until indicator  of this option comes on.
- To deactivate the function, press "Extra Rinse" and "Easy Iron" touchpads at the same time until indicator  of this option goes off.

6 Extra Rinse Touchpad

This option is recommended for people who are allergic to detergents, and in areas where the water is very soft.

Press it to add rinsing phases to a program.

The indicator of this option comes on.

7 Delay End Touchpad

Before you start the program, this option makes it possible to define the end of the washing program from minimum of 1 hour to maximum of 19 hours.

 If program duration is longer than 3 hours, minimum Delay End option starts from 4 hours.

Press the Delay End touchpad to choose the end time as you wish. The display shows the number of hours and the indicator beside the touchpad is on.

 This option must be selected after choosing the wash program, and before pressing the "Start/Pause" touchpad.

For example, if the program duration of your selected program is 3.20 hours and you define the "Delay End" time to 6 hours. This means your wash program will finish in 6 hours. (See diagram)

After selecting Delay End time, press Start/Pause touchpad to start the program. Machine will then countdown and update time on the display every hours until it reaches the starting point of the wash cycle.

If you wish to modify or cancel Delay End option after starting the program, follow the steps below:

- set the washing machine to PAUSE by pressing “Start/Pause” touchpad;
- deselect this option by pressing “Delay End” touchpad, the display shows delay time “□”; or press this touchpad again to select your desired time.
- press the “Start/Pause” to start the program.

8 Easy Iron Touchpad

When selecting this option, the laundry is gently washed and spun to avoid creasing. In this way, ironing is easier. The indicator of this option will be on.

9 Soak

This option allows you to soak heavily soiled clothes and stained items at the beginning of the wash before main washing phase.

This option will increase the duration of the program selected for about 50 minutes. And uses more water from normal wash. The process is as follows.

1. fill water and turn the washing drum (this takes about 20 minutes)

After press Start/Pause touchpad, the machine will start add water to the washing drum, which will start to rotate slowly to dissolve detergent and evenly distribute cloths.

2. soak (this takes about 30 minutes.)

The machine will enter the process of soaking, The washing drum will stop and rotate once in a while in order to redistribute cloths.

3. Once the soak process complete, the machine will check the water level again and will start the selected program and continue by using the same soak water.

NOTE

If you Do not wish to use the soak water to wash cloth, please follow the steps below:

1. Press Start/Pause to pause the washing machine. Then press On/Off to turn off the machine.
2. Press On/Off again to start the machine, add detergent, and select the program of your choice. Press Start/Pause again to start the selected program.

The machine will detect and drain the water in the washing drum out automatically and fill in water once again to be used for washing.

NOTE

- Any temperature may be selected, but “Cold” water is recommended with this cycle as hotter water may set some stains.
- Use the amount of detergent recommended for a normal wash cycle. If desired, use a bleach or a soaking agent safe for the fabric, by pouring it into the detergent compartment.

10 Start/Pause and Add Clothes Touchpad

This touchpad has 2 functions:

- Start/Pause ():

After you have selected the desired program and options, press this touchpad to start the machine. The Start/Pause pilot light will stop flashing and remain lit until the water level is above the bottom edge of the door then pilot light goes OFF. If you have selected a “Delay End” option, the countdown will begin and will be shown in the display.

To interrupt a program which is running, press this touchpad to pause the machine, the Start/Pause pilot light flashes.

To restart the program from the point at which it was interrupted, press this touchpad again, the Start/Pause pilot light will stop flashing.

- Add Clothes ():

 You can only add clothes if “Start/Pause” pilot light is lit.

While running a program, you may add clothes by:

- Pressing the “Start/Pause” touchpad to pause the program.
 - Wait for the machine to come to a complete stop before opening the door.
 - Add clothing and close the door.
 - Resume the program by pressing “Start/Pause” touchpad again.
-

11 Buzzer Sounds

The buzzer sounds operate when:

- The program is completed.
- The appliance has a malfunction.

If you want to disable the buzzer sound (except for event of appliance has a malfunction), press “Easy Iron” and “Soak” touchpads at the same time about 6 seconds, and listen for “BEEP, BEEP”.

To return to default configuration press these 2 touchpads at the same time for 6 seconds, and listen for “BEEPS”.

Programs + Options

Program; Temperature	Type of load;	Max. weight of load		Max. Spin (rpm)	Options can be combined
		EWF7525DGWA	EWF8025DGWA		
Off	This position to reset program/switching off the machine.	-	-	-	-
Cottons; Cold to 90°C	White and coloured cotton with heavy level of soil;	7.5 kg	8.0 kg	1200	 /   /   / 
Mixed; Cold to 60°C	Synthetic or mixed fabric items;	3.5 kg	3.5 kg	1200	 /   /   / 
Bedding; Cold to 60°C	Special program for one synthetic blanket, duvet, bedspread and so on;	3.5 kg	3.5 kg	800	 /   /  
Baby Care; Cold to 40°C	Baby cotton clothes and delicate knitting items with normal soil;	3.5 kg	3.5 kg	1200	 /   /  
Energy Saver; ¹⁾ 40°C, 60°C	White and colourfast, cotton with normal soil. Set this program to have a good washing results and decrease the energy consumption. The time of the washing program is extended;	7.5 kg	8.0 kg	1200	 /   /  
Tub Clean	For cleaning the tub.	-	-	-	-
Spin	To spin the laundry and drain the water in the drum;	7.5 kg	8.0 kg	1200	 / 
Rinse + Spin	To rinse and spin the laundry;	7.5 kg	8.0 kg	1200	 /  
Quick 20; Cold to 30°C	Synthetic and mixed fabric items. Light soil and items to freshen up;	1.5 kg	1.5 kg	800	 /  
Daily 60; 30°C, 40°C, 50°C, 60°C	Coloured cotton e.g. shirts, blouses, towels and undergarments with normal level of soil;	4.0 kg	4.0 kg	1200	 /   / 
Delicates; Cold to 40°C	Delicate fabrics such as acrylics, viscose, polyester items;	3.5 kg	3.5 kg	1200	 /   /  

1) Energy Saver program with 60 °C option selected is recommended for a full load of normally soiled cottons.

4. BEFORE FIRST USE

1. Ensure that the electrical and water connections comply with the installation instructions.
2. Put 2 litres of water in the detergent compartment for washing phase. This activates the drain system.

3. Select a Cottons cycle at 90 °C, without any laundry in the machine, to remove any manufacturing residue from the drum and tub. Pour 1/2 a measure of detergent into the dispenser drawer and start the machine.

5. DAILY USE

- Connect the mains plug to the mains socket.
- Turn the water tap on.

5.1 Four Steps Start Up Guide

Step 1 - Setting A Program For Washing

1. Turn the program selector dial to the required program.
 - The selector dial can be turned either clockwise or anticlockwise.
 - Once you select a wash program, the program selected will stay at that position for the whole of the wash.

2. If you want your laundry to be spun or use temperature different from the one proposed by the washing machine, press the Spin “@” and the temperature “🌡️” touchpads repeatedly to change the spin speed and temperature.

3. Press the option touchpads, if you want your laundry to be washed with special functions.

Different functions can be combined which is dependent on the program selected.

When these touchpads are pressed, the corresponding pilot lights come on. When they are pressed again, the pilot lights go out.

4. If you want to define the end of the washing program, press the “Delay End (⏸)” touchpad repeatedly to choose your washing machine working time.

Step 2 - Loading The Laundry

1.  Before loading the laundry, please make sure:

- Empty pockets.

- Tie the cords.

- Fasten buttons.

- Close zippers.

- Underwired bras must NOT be machine washed.

2. Open the door by carefully pulling the door handle outwards.

Check and remove objects (if there are any) that could be trapped in the fold.

3. Place the laundry in the drum, one item at a time, shaking them out as much as possible.

4. Make sure that no laundry remains between the seal and the door.

5. Close the door.

Step 3 - Using Detergent And Additives

1. Detergent Dispenser Drawer

The detergent dispenser is divided into two compartments.

-  Compartment "MAIN WASH"
 This compartment is used for detergent on all programs.

 Detergent flap

Flap for powder or liquid detergent.

-  Compartment "SOFTENER"
 This compartment is used for fabric conditioner and starching agent.

Powder or liquid detergent.

Position **up**
for powder
detergent
(factory setting).

Position **down**
for liquid
detergent.

When you use the liquid detergent:

- Do not use gelatinous or thick liquid detergents.
- Do not put more liquid than the maximum level.
- Do not set the Delay End.

- Measure out the detergent and the fabric softener;

- Pull out the dispenser drawer until it stops.
- Measure out the amount of detergent required, pour it into the main wash compartment ().

- If required, pour fabric softener into the compartment marked  (the amount used must not exceed the "MAX" mark in the drawer).

- Close the drawer gently.

Step 4 - Starting a program

To start a program, press the Start/Pause (▷||) touchpad, the corresponding pilot light will stop flashing and a default program duration will be displayed on the screen (only for display models).

i After approx. 15 minutes from the start of a program:

- The appliance will automatically adjust the selected program duration according to the type and size of the load.

i NOTE

If you turn the program selector dial to another program when the machine is working, the symbol " - - - " will flash on display along with buzzer sound to indicate a wrong selection. The machine will not perform the new selected program.

If an option is not compatible with the wash program selected, the symbol " - - - " will flash on display along with buzzer sound.

5.2 Interruption Of A Program

- To pause press Start/ Pause. The indicator will start flashing.
- Press the Start/Pause again. The program will continue.

5.3 Changing A Program

Changing a running program is possible only by resetting it.

1. Turn the program selector knob to the position "Off" to cancel the program and to turn off the appliance.
2. Turn the program selector knob to the new program position and set the new option, then press "Start/Pause" touchpad again.

The appliance will not drain the water.

5.4 Changing The Options

It is possible to change only some option after the program has started.

1. Press the touchpad Start/Pause. The indicator will start flashing.
2. Change the options.
3. Press Start/Pause again. The program will continue.

5.5 Opening The Door

While a program or the Delay End is operating, the appliance door is locked and the door lock indicator "  " is on. First set the machine to PAUSE by pressing the "Start/Pause" touchpad. Wait until the door lock indicator "  " goes off, then the door can be opened.

If the door lock indicator "  " does not disappear, this means that the machine is already heating and the water level is above the bottom edge of the door or the drum is turning. In this case the door CAN NOT be opened. If you need to open it, **you must drain the water to open the door.**

To drain the water, you have to switch the machine off by pressing the "On/Off" button to deactivate the appliance. Turn On the machine and select "Spin" program, you can select "No Spin  ", if you want the machine to only drain the water then press Start/Pause touchpad to start the program.

5.6 At The End Of The Program

- The appliance stops automatically.
- The acoustic signal will operate.
- The display will show "  ".
- The indicator of the Start/Pause touchpad goes off.
- The door lock indicator "  " goes off.
- Remove the laundry from the appliance. Make sure that the drum is empty.
- Keep the door ajar, to prevent the mildew and odours.
- Turn off the water tap.

5.7 When The Washing Program Is Completed, But There Is Water In The Drum

(Option “Rinse & Hold  ” is used)

- The drum turns regularly to prevent the creases in the laundry.
- The indicator “Start/Pause ()” flashes to remind you to drain the water.
- The door lock indicator “  ” is on. The door stays locked.

You must drain the water to open the door.

To drain the water:

1. Press the “Start/Pause ()” touchpad. The appliance drains the water and spins with the maximum spin speed for selected program.

Alternatively, before pressing the “Start/Pause” touchpad, you can press the “Spin” touchpad to change the spin speed. You can select “No Spin  ”, if you want the machine to only drain the water.

2. When the program is completed and the door lock indicator “  ” goes off, you can open the door.
3. Turn the program selector knob to the position “Off” to turn off the appliance.

 NOTE:

After approximately 18 hours, if you do not press Start/Pause touchpad, the appliance will drain and spin automatically.

5.8 Stand By Mode

5 minutes after the washing program ends, if you do not deactivate the appliance, the energy saving function activates.

The energy saving function decreases the energy consumption when the appliance is in the stand by mode.

- All indicators and the display will switch off.
- The indicator of the touchpad Start/Pause will flash slowly.
- Press one of the touchpads to deactivate the energy saving status.

6. WASHING HINTS

6.1 Sorting The Laundry

Follow the wash code symbols on each garment label and the manufacturer's washing instructions. Sort the laundry as follows: whites, coloureds, synthetics, delicates, woollens.

6.2 Temperatures

Temp	Soil Level
90°C	For normally soiled white cottons and linen (e.g. teacloths, towels, tablecloths, sheets...).
60°C 50°C	For normally soiled, colourfast garments (e.g. shirts, night dresses, pyjamas...) in linen, cotton or synthetic fibres and for lightly soiled white cotton (e.g. underwear).
40°C 30°C Cold	For delicate items (e.g. net curtains), mixed laundry including synthetic fibres and woollens bearing the label pure new wool, machine washable, non-shrink.

6.3 Before Loading The Laundry

Never wash whites and coloureds together. Whites may lose their "whiteness" in the wash.

New coloured items may run in the first wash; they should therefore be washed separately the first time.

Make sure that no metal objects are left in the laundry (e.g. hair clips, safety pins, pins).

Button up pillowcases, close zip fasteners, hooks and poppers. Tie any belts or long tapes.

Remove persistent stains before washing.

Rub particularly soiled areas with a special detergent or detergent paste. Treat curtains with special care. Remove hooks or tie them up in a bag or a net.

6.4 Maximum Loads

Recommended loads are indicated in the program charts. General rules:

Cotton, linen:	drum full but not too tightly packed;
Synthetics:	drum no more than half full;
Delicate fabrics and woollens:	drum no more than one third full.

Washing a maximum load makes the most efficient use of water and energy. For heavily soiled laundry, reduce the load size.

6.5 Removing Stains

Stubborn stains may not be removed by just water and detergent. It is therefore advisable to treat them prior to washing.

Blood: treat fresh stains with cold water. For dried stains, soak overnight in water with a special detergent then rub in the soap and water.

Oil based paint: moisten with benzine stain remover, lay the garment on a soft cloth and dab the stain; treat several times.

Dried grease stains: moisten with turpentine, lay the garment on a soft surface and dab the stain with the fingertips and a cotton cloth.

Mould stains: treat with bleach, rinse well (whites and fast coloureds only).

Grass: soap lightly and treat with bleach (whites and fast coloureds only).

Rust: oxalic acid dissolved in hot water or a rust removing product used in cold water. Be careful with rust stains which are not recent since the cellulose structure will already have been damaged and the fabric tends to hole.

Ball point pen and glue: moisten with acetone (*), lay the garment on a soft cloth and dab the stain.

Lipstick: moisten with acetone (*) as above, then treat stains with methylated spirits. Remove any residual marks from white fabrics with bleach.

Red wine: soak in water and detergent, rinse and treat with acetic or citric acid, then rinse. Treat any residual marks with bleach.

Ink: depending on the type of ink, moisten the fabric first with acetone (*), then with acetic acid; treat any residual marks on white fabrics with bleach and then rinse thoroughly.

Tar stains: first treat with stain remover, methylated spirits or benzene, then rub with detergent paste.
(*) do not use acetone on artificial silk.

6.6 Detergents Type And Quantity Of Detergent

Low sudsing detergent is required for this washing machine to prevent oversudsing problems, unsatisfied washing result and harm to the machine.

Low sudsing detergents designed for front load washing machines are labelled "Front Loading", "high efficiency", "HE", such as Cold Power for Front Loaders or "Matic".

Do not use wrong types of detergent, such as Top Loading, Handwash detergent or Soap-Based products in your frontload washing machine. This can result in excessive suds, longer cycle time, low spin speeds, poor rinsing and overloading of the motor.

6.7 Quantity of detergent to be used

The choice of detergent and use of correct quantities not only affects your wash performance, but also helps to avoid waste and protect the environment. Although biodegradable, detergents contain substances which in large quantities can upset the delicate balance of nature.

The choice and quantity of detergent will depend on;

- type of fabric (delicates, woollens, cottons, etc.);
- the colour of clothes;
- size of the load;
- degree of soil;
- wash temperature; and
- hardness of the water used.

Water hardness is classified by so-called "degrees" of hardness.

Information on hardness of the water in your area can be obtained from the relevant water supply company, or from your local authority.

You may have to try using the detergent quantity as per manufacturers' instructions then compare the wash result to the list below and adjust the amount of detergent for your future washes accordingly.

Not enough washing powder causes:

- the washload to turn grey,
- greasy clothes.

Too much washing powder causes:

- sudsing,
- reduced washing effect,
- inadequate rinsing.

Use less detergent if:

- you are washing a small load,
- the laundry is lightly soiled,
- large amounts of foam during washing.

7. INTERNATIONAL WASH CODE SYMBOLS

i These symbols appear on fabric labels, in order to help you choose the best way to treat your laundry.

<p>Energetic wash</p>   <p>Delicate wash</p>	 <p>Max. wash temperature 95 °C</p>	 <p>Max. wash temperature 60 °C</p> 	 <p>Max. wash temperature 40 °C</p>  	 <p>Max. wash temperature 30 °C</p> 	 <p>Hand wash</p>	 <p>DO NOT wash at all</p>
 <p>Bleaching</p>	 <p>Bleach in cold water</p>			 <p>DO NOT bleach</p>		
 <p>Ironing</p>	 <p>Hot iron max. 200 °C</p>	 <p>Warm iron max. 150 °C</p>	 <p>Lukewarm iron max. 110 °C</p>	 <p>DO NOT iron</p>		
 <p>Dry cleaning</p>	 <p>Dry cleaning in all solvents</p>	 <p>Dry cleaning in perchlorethylene, petrol, pure alcohol, R 111 & R 113</p>	 <p>Dry cleaning in petrol, pure alcohol and R 113</p>	 <p>DO NOT dry clean</p>		
 <p>Drying</p>	 <p>Flat</p>	 <p>On the line</p>	 <p>On clothes hanger</p>	 <p>High temperature</p>  <p>Low temperature</p> <p>Tumble dry</p>	 <p>DO NOT tumble dry</p>	

8. CARE AND CLEANING

WARNING!

You must **DISCONNECT** the appliance from the electricity supply, before you can carry out any cleaning or maintenance work.

8.1 External Cleaning

Clean the appliance only with soap and warm water. Fully dry all the surfaces.

CAUTION!

Do not use alcohol, solvents or chemical products.

8.2 Descaling

The water we use normally contains lime. It is a good idea to periodically use a water softening powder in the machine.

Do this separately from any laundry washing, and according to the softening powder manufacturer's instructions.

This will help to prevent the formation of lime deposits.

8.3 After Each Wash

Leave the door open for a while. This helps to prevent mould and stagnant smells forming inside the appliance. Keeping the door open after a wash will also help to preserve the door seal.

8.4 Maintenance Wash

With the use of low temperature washes it is possible to get a build up of residues inside the drum.

We recommend that a maintenance wash be performed on a regular basis.

To run a maintenance wash:

- The drum should be empty of laundry.

- Select the hottest "Regular" wash program.
- Use a normal measure of detergent, must be a powder with biological properties.

8.5 Cleaning The Dispenser Drawer

The washing powder and additive dispenser drawer should be cleaned regularly.

Remove the drawer by pressing the catch downwards and by pulling it out. Flush it out under a tap, to remove any traces of accumulated powder.

To aid cleaning, the top part of the additive compartment should be removed.

8.6 Cleaning The Drawer Bottom

After washing cycle finish, residues of softener and water may remain in the softener dispenser. It is recommended to clean the bottom of softener dispenser regularly to remove any residue.

To clean the bottom of softener dispenser:

1. After pulling out the drawer from its recess, turn the bottom side up.

2. Push the catch and pull up the softener bottom cover.

3. Clean the dispenser with an old toothbrush under the water tap.

4. Close the softener bottom cover.

8.7 Cleaning The Drawer Recess

Having removed the drawer, use a small brush to clean the recess, ensuring that all washing powder residue is removed from the upper and lower part of the recess. Replace the drawer and run the rinse program without any clothes in the drum.

8.8 Cleaning The Water Inlet Filter

If your water is very hard or contains traces of lime deposit, the water inlet filter may become clogged.

It is therefore a good idea to clean it from time to time.

To clean the water inlet filters:

1. Close the water tap.
2. Remove the water inlet hose from the water tap.

3. Clean the filter in the inlet hose with a stiff brush.

4. Remove the inlet hose behind the appliance.
5. Clean the filter in the valve with a stiff brush or a towel.

6. Install again the inlet hose. Make sure that the couplings are tight to prevent leakages.

7. Open the water tap.

8.9 The Dangers Of Freezing

If the machine is exposed to temperatures below 0°C, certain precautions should be taken.

i Do this procedure also when you want to do the emergency drain.

! **Disconnect the mains plug from the mains socket.**

1. Turn off the water tap.
2. Unscrew the inlet hose.
3. Remove the drain hose from the rear support and unhook it from sink or spigot.

4. Put the ends of the drain and inlet hose in a container. Let the water flow out of the hoses.
5. When no more water flows, install the inlet hose and the drain hose again.

! **Make sure that the temperature is more than 0 °C before you use the appliance again.**
The manufacturer is not responsible for damages caused by low temperatures.

9. TROUBLESHOOTING

Certain problems are due to lack of simple maintenance or oversights, which can be solved easily without calling out an engineer. Before contacting your local Service Centre, please check possible cause of malfunction and solution listed below.

Once the problem has been eliminated, press the Start/Pause button to restart the program. If after all checks, the problem persists, contact your local Service Centre.

WARNING! Deactivate the appliance before you do the checks.

Alarm Code:

E10	The appliance does not fill with water properly.
E20	The appliance does not drain the water.
E40	The appliance door is open or not closed correctly. Please check the door!
E40	The main supply is unstable. Wait until the main supply is stable.
E91	No communication between electronic elements of the appliance. Switch off and switch on again.
EFO	Water leaks inside the machine. Please call Service Centre.

Malfunction	Possible cause	Solution
The washing machine does not start:	The door has not been closed. Error code: E40 .	Close the door firmly.
	The plug is not properly inserted in the power socket.	Insert the plug into the power socket.
	There is no power at the socket.	Please check your domestic electrical installation.
	The Start/Pause button has not been pressed.	Press the Start/Pause button.
	The Delay End has been selected.	If the laundry are to be washed immediately, cancel the Delay End.
	The Main supply is unstable. Error code: E40	Wait until the main supply is stable. Appliance will start automatically.
The machine does not fill the water:	The water tap is closed. Error code: E10 .	Open the water tap.
	The inlet hose is squashed or kinked. Error code: E10 .	Check the inlet hose connection.
	The filter in the inlet hose is blocked. Error code: E10 .	Clean the water inlet hose filter.
	The door is not properly closed. Error code: E40 .	Close the door firmly.

Malfunction	Possible cause	Solution
The machine fills then empties immediately:	The end of the drain hose is too low. Error code: E 10 .	Refer to relevant paragraph in “water drainage” section.
The machine does not empty and/or does not spin:	The drain hose is squashed or kinked. Error code: E 20 .	Check the drain hose connection.
	The option “Rinse Hold  ” or “No Spin  ” has been selected.	Press Start/Pause touchpad to drain the water or select spin program.
	The laundry is not evenly distributed in the drum.	Pause the machine and redistribute laundry manually.
There is water on the floor:	Too much detergent or unsuitable detergent (creates too much foam) has been used.	Reduce the detergent quantity or use another one.
	Check whether there are any leaks from one of the inlet hose fittings. It is not always easy to see this as the water runs down the hose; check to see if it is damp.	Check the water inlet hose connection.
	The drain hose is damaged.	Change it with a new one.
	Water leaks inside the machine. (code: EFD)	Disconnect the main plug from the main socket. Turn off the water tap. Contact your local Service Centre.
Unsatisfactory washing results:	Too little detergent or unsuitable detergent has been used.	Increase the detergent quantity or use another one.
	Stubborn stains have not been treated prior to washing.	Use commercial products to treat the stubborn stains.
	The correct temperature was not selected.	Check if you have selected the correct temperature.
	Excessive laundry load.	Reduce load.
The door will not open:	The program is still running.	Wait until the end of washing cycle.
	There is water in the drum.	You must drain the water to open the door (refer “Opening The Door” on page 15).
	This problem may be caused by a failure of the appliance.	Contact Service.

Malfunction	Possible cause	Solution
The machine vibrates or is noisy:	The transit bolts and packing have not been removed.	Check the correct installation of the appliance.
	The support feet have not been adjusted.	Check the correct levelling of the appliance.
	The laundry is not evenly distributed in the drum.	Pause the machine and redistribute laundry manually.
	There is very little laundry in the drum.	Load more laundry.
	Unstable floors eg. wooden floors.	Refer to relevant paragraph in "Positioning" section.
Cycle time longer than displayed:	Detergent over dose.	Reduce the detergent quantity or use another one.
	Machine unbalance.	Redistribute laundry manually in the drum and start the spin phase again. Refer to relevant paragraph in "Positioning" section.
Spinning starts late or the machine does not spin:	<p>The electronic unbalance detection device has cut in because the laundry is not evenly distributed in the drum.</p> <p>The laundry is redistributed by reverse rotation of the drum.</p> <p>This may happen several times before the unbalance disappears and normal spinning can resume. If, after 10 minutes, the laundry is still not evenly distributed in the drum, the machine will not spin. In this case, redistribute the load manually and select the spin program.</p>	Pause the machine and redistribute laundry manually.
The machine makes an unusual noise:	Machine not installed properly.	Make sure the levelling of the appliance is correct. Refer to 'Installation'.
	Transit bolts or packaging not removed.	Make sure that the packaging and/or the transit bolts are removed. Refer to "Installation".
	The load may be too small.	Add more laundry in the drum.

Malfunction	Possible cause	Solution
No water is visible in the drum:	Machines based on modern technology operate very economically using very little water without affecting performance.	

If you are unable to identify or solve the problem, contact our service centre.

Before telephoning, make a note of the model, serial number and purchase date of your machine: the Service Centre will require this information.

10. TECHNICAL DATA

Dimensions	Width	57 cm	
	Height	85 cm	
	Depth	60 cm	
Power supply (voltage/frequency)		220-240 V/50 Hz	
Total power absorbed		2000 W	
Minimum fuse protection		10 A	
Water supply pressure	Maximum	0.8 MPa	
	Minimum	0.05 MPa	
Maximum capacity (dry clothes)		EWF7525DGWA	EWF8025DGWA
	Cottons	7.5 kg	8.0 kg
	Mixed	3.5 kg	3.5 kg
	Bedding	3.5 kg	3.5 kg
	Baby Care	3.5 kg	3.5 kg
	Energy Saving	7.5 kg	8.0 kg
	Tub Clean	-	-
	Spin	7.5 kg	8.0 kg
	Rinse + Spin	7.5 kg	8.0 kg
	Quick 20	1.5 kg	1.5 kg
	Daily 60	4.0 kg	4.0 kg
Delicates	3.5 kg	3.5 kg	
Spin speed (Maximum / Minimum)		1200 rpm / 400 rpm	

11. INSTALLATION

11.1 Positioning

It is important that your washing machine stands firm and level on the floor to ensure correct operation.

That the appliance must not be installed behind a lockable door, a sliding door or a door with a hinge on the opposite side to that of the washing machine door is restricted.

Use a spirit level on the top and side of the washing machine to check the levels.

If you do not have a spirit level, as a guide use the edge of a door frame, cupboard or bench to check that the washing machine is level.

Loosen or tighten the feet to adjust the level. A correct adjustment of the appliance level prevents the vibration, noise and the movement of the appliance when in operation.

When the washing machine is levelled, try to rock it from corner to corner. If it does rock, adjust the legs again until it is levelled and does not rock.

Never place cardboard, wood or similar materials under the machine to compensate for any unevenness in the floor.

Install the machine on a flat hard floor. Make sure that air circulation around the machine is not impeded by carpets, rugs etc.

Check that the machine does not touch the wall or cupboard units.

11.2 Water Inlet

Connect the water inlet hose to a tap with 3/4" BSP thread.

Use the hose supplied with the washing machine. **DO NOT USE OLD HOSES.**

The other end of the inlet hose which connects to the machine can be turned in any direction.

Simply loosen the fitting, rotate the hose and retighten the fitting, making sure there are no water leaks.

The inlet hose must not be lengthened. If it is too short and you do not wish to move the tap, you will have to purchase a new, longer hose specially designed for this type of use.

11.3 Water Drainage

The end of the drain hose can be positioned in three ways:

Hooked over the edge of a sink using the plastic hose guide supplied with the machine.

In this case, make sure the end cannot come unhooked when the machine is emptying.

This could be done by tying it to the tap with a piece of string or attaching it to the wall.

In a sink drain pipe branch. This branch must be above the trap so that the bend is at least 60 cm above the ground.

Directly into a drain pipe at a height of not less than 60 cm and not more than 90 cm.

The end of the drain hose must always be ventilated, i.e. the inside diameter of the drain pipe must be larger than the outside diameter of the drain hose.

The drain hose must not be kinked. Run it along the floor; only the part near the drainage point must be raised.

For the correct functioning of the machine the drain hose must remain hooked on the proper support piece situated on the top part of back side of the appliance.

11.4 Electrical Connection

This machine is designed to operate on a 220-240 V, single-phase, 50 Hz supply.

“An incorrect power supply may void your warranty.”

Check that your domestic electrical installation can take the maximum load required (2.0 kW), also taking into account any other appliances in use.

CAUTION!

Connect the machine to an earthed socket outlet.

The manufacturer declines any responsibility for damage or injury through failure to comply with the above safety precaution.

Should the appliance power supply cable need to be replaced, this should be carried out by our Service Centre.

When the appliance is installed the power supply cable must be easily accessible.

 For safety reasons do not use double adaptors, extension cords and multi-plug adapters.

12. ENVIRONMENT CONCERNS

12.1 Packaging Materials

The materials marked with the symbol  are recyclable.

- >PE<=polyethylene
- >PS<=polystyrene
- >PP<=polypropylene

This means that they can be recycled by disposing of them properly in appropriate collection containers.

12.2 Old Machine

Use authorised disposal sites for your old appliance. Help to keep your country tidy!

The symbol  on the product or on its packaging indicates that this product may not be treated as household waste.

Instead it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment.

By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product.

For more detailed information about recycling of this product, please contact your local city office, your household waste disposal service or the shop where you purchased the product.

12.3 Ecological Hints

To save water, energy and to help protect the environment, we recommend that you follow these tips:

- Normally soiled laundry may be washed without prewashing in order to save detergent, water and time (the environment is protected too!).
- The machine works more economically if it is fully loaded.
- With adequate pre-treatment, stains and limited soiling can be removed; the laundry can then be washed at a lower temperature.
- Measure out detergent according to the water hardness, the degree of soiling and the quantity of laundry being washed.
